THE POTENTIAL ENVIRONMENTAL MANIPULATION SUMMARY REPORT

Environmental manipulation in different areas of the mine site including orka village before and after, including slashing of grasses, pruning of garden, and removing of grasses on the roads around Orka, facilities building and duplex houses. The bellows pictures shows the different areas and location where activities environmental manipulation and cleanness takes place.

We have covered about 70% of cleanness of the total areas of the mine.

At Orka village when we started cleanness activities as shown above.

Activities on progress at Orka village early stage

Finishing stage at Orka village.

Entrance to orka areas, as you can see the difference before and after finishing of cleanness a different is too big compared to the beginning of the job.

Duplex house and facilities and service areas.

Apart from that also we covered Airstrip about 80% as shown bellow.

At Airstrip after we completed mowing of grasses .
